Summary

Dear clients,

The new reports **TPTTBS** and **TPTBNR** are now available on E-file in both environments (**production** and **homologation**).

You can already send those **XML files**, whether manually or automatically thanks to the Sending Service.

The automatic sendings can be done via the **Sending Service** since the **release of November**. You may have to perform an updated.

The folders where to place the reports in the Sending Service are:

- \ReportingDiffusion\TPT\TPTBNT for the TPTBNR
- \ReportingDiffusion\Securisation for the TPTTBS

If you are not able to create them, we **provide a tool** in order to **generate them**. Please note that this tool is different from the PDFs you are used to as it is Flex form.

You will find further information on the **manual way** in our video:

https://www.e-file.lu/videos/Util_SBS_Flex_EN.htm

Please note that **no service interruption is expected**.
