Maintenance at the CSSF – channel reopened

Dear client,

Please be informed that the communication channel to the CSSF has been reopened and some production tests have also been successfully concluded.

While we actively monitor the transmission channel, you are also kindly requested to actively monitor your next transmissions to ensure a good delivery to the CSSF.

Should you envisage an unexpected behaviour, please do not hesitate to contact us at the below indicated contact details.

Reminder – CSSF naming convention

Due to this technical migration and update at the CSSF side, please ensure that you follow the instructions outlined in the following CSSF document

http://www.cssf.lu/fileadmin/files/Metier_OPC/FAQ/nomenclature_docs_electroniques.pdf

While e-file V2 already ensures the correct naming convention, should you submit reports manually and use e-file V1, please ensure that you follow the above mentioned document information.

We thank you for your understanding.
