Important information

From your Registration & Filing Team

Dear Clients and Partners,

Following our earlier communications regarding the upcoming [regulatory change](#) affecting the Common Reporting Standard (CRS) reporting to Administration des Contributions Directes (ACD) in Luxembourg. We would like to update you on the availability of the UAT testing environment.

What's changing?

As a reminder, these changes relate to the [EU Directive 2023/2226](#), which amends Directive 2011/16/UE, and extends the scope of CRS reporting to include income derived from crypto-assets (electronic currencies).

As an authorised channel for the transmission of CRS reporting, e-file will be updated to support the new requirements. Specifically:

- A new XSD schema (CRS 3.0) will be implemented in the e-file web form and Sending Service (V1 and V2).
- The CRS web form in e-file will be updated with enhanced validation controls to support the additional fields required under the new reporting layout.

From January 2027 onwards, all CRS submissions, including any corrections or cancellations relating to previous reporting periods, will be required to use the new format.

Key dates

- **Monday, 12 October 2026:** The UAT testing environment, with end-to-end connection to the regulator, will reopen. All updated features will be available for testing at this point, including the CRS web form, Transmission Module, and Sending Service V1 and V2.
- **January 2027:** The new CRS reporting format comes into effect for the 2026 reporting period.

Action required by you

From **Monday, 12 October 2026**, we encourage you to use of the UAT environment to test your CRS submissions ahead of the January 2027 go-live.

To use **Sending Service V1** in UAT: you will need to update the module to the latest version before testing. Please follow the instructions in section 3.3 on our [knowledge page](#) to complete the update. The steps are the same as for updating in your live environment.

Further guidance on the steps required to ensure a smooth transition will be shared in a forthcoming communication, including confirmation of the production availability date.

Can we help?

If you have any questions regarding these changes ahead of the next communication, please contact our e-file Support Team using the details below.

Kind regards,
FE fundinfo
