Migration of the administration section to e-File V2

Dear e-File administrator,

Please be informed that as part of our project to migrate from e-File V1 to e-File V2, we are about to deploy a **new enhanced module** dedicated to the **administrators**. The following activities will then become manageable in e-File V2:

- User management (creation, update deletion)
- Certificate management (generation of a csr file, certificate activation)

We will leave **the access to the old administrator module** on e-File V1 in place until the **end of the year**.

We will organise some training sessions at our premises to present you this new module / interface.

You can subscribe [here](#)

Should your firm IT security block www.doodle.com, please simply respond to this email and we will register you to one of the sessions. Please indicate which session you would like to attend.

We offer the following dates (in each session we will cover the same topics):

22 October 09:30 (French)

23 October 09:30 (English)

The training will be held at our premises at:

Fundsquare S.A.
35A Boulevard Joseph II
Luxembourg City
